

# Primary Care Services

## Your health is our priority

We are your first stop for healthcare. Given the right tools, information, access, and support, you can maintain and improve your health.

### We take the time to get to know you.

Longer appointments help you and your provider understand your health concerns. We manage your chronic conditions, medications, and coordinate your care with your primary and specialty care providers. Screenings, exams, and blood draws are right here, at your health center.

### We offer a wide range of in-person and virtual primary care services, including:

- Treatment for when you're sick
- Annual preventive exams, vaccines, labs, and screenings including well-woman and well-man exams
- Support for diabetes, high blood pressure, high cholesterol, asthma, and more
- Tobacco cessation, weight management, and stress reduction
- Prescription management
- Referral coordination

There is no cost or copay for any visit type for CEBT members on a PPO or EPO plan. Members on an HDHP will pay no cost or copay for virtual visits until June 2022. Those on an HDHP plan are also eligible for free in-person preventive visits and chronic condition visits, but will pay \$45 for sick visits.

**To schedule an appointment, please visit [my.marathon-health.com](https://my.marathon-health.com) or call your center directly.**
