

Primary Care Services

A personal approach to healthcare

We're reimagining healthcare to build a relationship with you because more time with your provider means more support to achieve your health goals. We give you the right tools, education, access, and support to live a healthier life.

We take the time to get to know you.

Longer appointments help you and your provider understand your health concerns. We can treat common illnesses, manage chronic conditions, and coordinate care with your other health providers or specialty doctors.

We offer a wide range of holistic healthcare services, including:

- Treatment for when you're sick
- Annual exams, vaccines, labs, and screenings
- Support for diabetes, high blood pressure, high cholesterol, anxiety, and more
- Tobacco cessation, weight management, and stress reduction
- Prescription management
- Virtual care

The nurse was so genuinely concerned about my illness; so much so, that she called me to ensure that I made it home safely.

– Marathon Health patient

There is no cost to patients for services delivered at the health centers (sick visits are \$45 for members on the HDHP only).
